I am currently a Senior in the College of Engineering at Virginia Tech, majoring in Computer Science. I am interested in pursuing experience in many categories of the Computer Science field, especially Cybersecurity and AI. I will be graduating in the Fall of 2026 with my Bachelors and graduating in the Spring of 2027 with my Master of Engineering in Computer Science and Applications.

Education:

Virginia Tech, Blacksburg VA,

(August 2023 - August 2027)

- Bachelor of Science in Computer Science by Fall 2026
- 3.71 GPA | 6X University Dean's List Recipient: Fall 2023 - Spring 2026
- Master of Engineering in Computer Science and Applications by Spring 2027

Relevant Coursework:

Intro to Software Design, Intro to Problem Solving, Software Design & Data Structures, Intro to Computer Organization I & II, Computer Systems, Data Structures and Algorithms I & II, Discrete Math, Multivariable Calculus, Applied Combinatorics, Introduction to Artificial Intelligence, AI tools in Software Engineering, Mobile Software & Web App Development.

Professional Experience

Cybersecurity Intern, CACI International Inc, (Internship: May 2026- August 2026, Part time: September 2026 - May 2027)

- Developed a BonsAI web app designed to drastically reduce compliance document creation timelines from the traditional 4-6 months down to weeks. Took input from a multitude of different sources and tools, normalized all of this data, mapped all of the vulnerabilities to NIST 800-53 Controls, and then generated various compliance and policy documents.
- Worked on an internally hosted AI harness utilizing retrieval-augmented generation (RAG) AI with various admin controls to accelerate our teams policy documentation and development
- Worked on a multi-agent AI system on the aforementioned AI harness, taking information from various API calls, external and internal sites, and internal software, then outputting and analyzing thousands of files and providing content for our team.

SSEP Intern, Naval Surface Warfare Center Division Dahlgren,

(Internship: July 2024 - August 2025)

- Assisted testing director and testing team during on-site test events
- Routine system testing outside of events and worked on identifying testable status requirements
- Learned the DevSecOps development framework to implement in our team's pipeline
- Secret Clearance (Cleared on July 2024)

Projects (All other projects are on my personal website)

noahbatterson.vercel.app | Personal Portfolio Website | Next.js, typescript, Tailwind CSS (August 2025 - September 2025)

- Personal website created using Next.js and Tailwind CSS, and deployed using Vercel. Implements UI with Tailwind CSS
- Contains a portfolio of my current and future projects, my most updated resume, and personal / contact information

CodewordsPlus | codewordsplus.vercel.app |

- An online multiplayer game where two teams play against each other, giving hints and guessing words. Built with React, TypeScript, Fastify, WebSockets, and Redis
- Built with a variant-first rules engine supporting 5×5 and 6×6 boards, configurable game modes, board mutations, and special role abilities without duplicating core game logic to maintain efficiency

ReadingTheBible | readingthebible.vercel.app |

- Bible reading planner for customized reading plans, flexible progression, and consistency across devices. Offers a space to build plans, read the Bible, and links to external site BibleGateway for far more translations and audiobook listening
- Built using Next.js, TypeScript, Tailwind CSS, and IndexedDB

Skills

Proficiencies: Python, Java, C, Git, Github, GitLab, Vercel

Learning: React, Next.js, Typescript, JavaScript, HTML/CSS, Tailwind CSS, SQL, Assembly, Django, Postgresql, Celery, Redis

Other Skills: Data structures & algorithms, Problem solving, DevSecOps, DevOps, Agile, Testing driven development, Team based projects, Teamwork, Time management, Web development, Prompt Engineering, and System Architecture
